IN THE EIGHTH JUDICIAL DISTRICT COURT OF DUCHESNE COUNTY

STATE OF UTAH

IN THE MATTER OF THE GENERAL DETERMINATION OF ALL THE RIGHTS TO THE USE OF WATER BOTH SURFACE AND UNDERGROUND WITHIN THE DRAINAGE AREA OF THE UINTAH BASIN IN UTAH	PETITION TO APPROVE 2016 COMMISSIONER'S REPORT, 2017 PROPOSED BUDGET AND ASSESSMENTS, REQUEST TO APPOINT 2017 RIVER COMMISSIONER FOR THE LAKE FORK AND YELLOWSTONE RIVERS AND SAND WASH CREEK Docket No. 560800056 Judge Samuel Chiara
---	--

Petitioner and the Committee for the Lake Fork River, Yellowstone River and Sand Wash Creek, submit herewith the 2016 Annual Report of the Commissioner, the proposed 2017 Budget and Schedule of Assessments, and the 2017 proposed Schedule of Distribution, in accordance with the Interim Distribution Order signed by the Court on May 18, 1998. Petitioners, also, request the Appointment of the River Commissioner for the year 2017.

In support of this Petition, Petitioners represent to the Court that;

RECEIVED

APR 24 2017

WATER RIGHTS
SALT LAKE

DC

1. By its Interim Order dated May 18, 1998, a committee of water users for the Lake Fork River, Yellowstone River and Sand Wash Creek was organized under the direction of this Court. A Chairman of the committee was designated to support the River Commissioner and to aid in carrying out the orders of this Court, in connection with the distribution system for the waters of the Lake Fork River, and the Yellowstone River and Sand Wash Creek systems.

2. The Committee of the Lake Fork River, Yellowstone River and Sand Wash Creek met on January 24, 2017 and Petitioner, Rodger Ames was elected Chairman of that committee and is authorized to file this Petition on behalf of said committee.

3. The committee received and approved the 2016 report of the administration of the waters of the Lake Fork River, Yellowstone River and Sand Wash Creek by Leland L. Carter, the River Commissioner for the year 2017. A copy of that report is filed herewith.

4. The committee reviewed and approved a budget, with schedule of assessments, for the expenses of the River Commissioner for the year 2017. The Budget and Schedule of Assessments are attached hereto as "Exhibit A".

5. The committee has reviewed and approved, after consultation with the Utah State Engineer, a proposed Schedule of Distribution of the Waters of the Lake Fork River, Yellowstone River and Sand Wash Creek and recommends it to the Court, for the year 2017. The proposed Schedule of Distribution is attached hereto as "Exhibit B".

6. The committee voted to recommend to the Court the appointment of Leland L. Carter

as River Commissioner of the Lake Fork River, Yellowstone River and Sand Wash Creek, for a term of one (1) year. Petitioner further alleges that Leland L. Carter is a competent and qualified person to act as said Water Commissioner.

7. It is requested by the committee, if for any reason the River Commissioner does not complete his term of office or is unable to fulfill his obligations as River Commissioner, that the committee be authorized to select a temporary replacement River Commissioner.

8. The committee requests that the Interim Order entered for the irrigation year of 1998 be reaffirmed and made applicable for the 2017 irrigation year, in the following respects:

a. It is requested that the River Commissioner be allowed to distribute the water of the streams and reservoirs involved in accordance with this Court's Interim Order and to do all things necessary for the proper and correct measurement, diversion and distribution of said waters, in accordance with the Decrees of the Federal District Court and state laws.

b. That the River Commissioner be directed to confer with the respective committees in developing a schedule for distribution of water, specifically, the manner in which the waters of the Lake Fork River, Yellowstone River and Sand Wash Creek, and their tributaries, should be distributed, after consultation with the State Engineer, and shall submit annually a recommended Interim Distribution Order to this Court for its consideration.

c. That the River Commissioner be directed to deliver and distribute the waters of such non-Federal water rights in the Lake Fork River, Yellowstone River and Sand Wash Creek, in accordance with the proposed Schedule of Distribution, attached hereto as "Exhibit B".

d. That the waters for the Federal and non-Federal water rights be distributed in accordance with the terms and limitations of the 1923 Federal Court Decrees in cases numbered 4437 and 4418.

e. That the River Commissioner be required to work with the respective committees to prepare a recommended budget to be submitted to the Court along with a recommended annual budget. Said annual report and recommended budget are to contain assessments made, monies received, along with a report of expenditures. The Court, after receiving the proposed annual budget, shall provide a thirty (30) day period for objections to be filed.

f. Upon approval by the Court, the River Commissioner be authorized to manage the budget, to implement the ordered assessments and collection of assessed amounts from the non-Federal water user organizations or water users, and request assessment and collection from the Bureau of Indian Affairs on the Uintah Indian Irrigation Project, in accordance with the approved budget and schedule of assessment.

g. Any person or entity, which is a water user in the subject rivers, or otherwise affected by the actions of the River Commissioner, may petition and appear before this Court (about the assessment amounts, the manner in which the water is distributed and/or any other claim relating to the distribution of water). In the event there is a violation of the Court's Order or any part of this Petition or, in the opinion of the River Commissioner, the occurrence of the unauthorized use of water, the River Commissioner be directed to recommend to this Court a solution to the problem, including any remedy to be imposed on the unauthorized water user or violator of the Order.

h. If a non-Federal water user fails to pay any assessments levied, when due, that water users further use of water is prohibited.

i. The Water Commissioner should acquire knowledge of all water rights under his jurisdiction. These water rights will then be distributed to water companies in a timely and fair manner. All water delivery needs to be recorded and presented as requested by water users and state entities with the inclusion of a final year end report.

j. The River Commissioner is responsible for all water changes and must be available on a daily basis. The River Commissioner should physically open head gates and make sure that measuring devices are accurate and that recording

devices are working properly. He should periodically check recording devices as required throughout the season, or more often if necessary.

k. The River Commissioner should monitor rivers in his jurisdiction to determine when flows need to be changed. All canal companies' use, no matter where the water comes from, needs to be recorded and reported weekly.

l. The Commissioner should be responsible for payment of bills. All checks must be cosigned by a member of his River Committee. Any purchase over \$200.00 must be pre-approved by the River Committee.

m. A weekly report of water usage for each company should be mailed to the company or made available on the internet.

n. The River Commissioner may find inappropriate water usage on the river. It is his responsibility to reduce this and, if possible, eliminate it. This may include resolving conflicts with individuals, getting help from the River Committee, involving the State Engineer's help or ultimately involving the State District Court. The methods used to resolve the problems should start easy and simple and pleasant as possible and go on to the next stage only as needed.

o. The year end report should be accurate and complete for all companies and ready for the River Committee budget meeting no later than December 1st.

9. A problem exists at the Rowley diversion being used by Kim Fisher. A head gate and

a measuring box needs to be installed by the water user. The committee requests the Court to authorize the Commissioner to hire the work necessary to construct the diversion works with a waterman head gate and a ramp flume measuring device and assess the water user the cost of that work, if the water users does not accomplish the necessary work within a reasonable time set by the commissioner.

WHEREFORE, Petitioner prays as follows:

1. That the 2016 report of the administration of the waters of the Lake Fork River, Yellowstone River and Sand Wash Creek be approved, as submitted and filed herewith.
2. That the 2017 Budget and Schedule of Assessments, be approved, as submitted and attached hereto as "Exhibit A".
3. That the proposed 2017 Schedule of Distribution of Waters of the Lake Fork River, Yellowstone River and Sand Wash Creek be approved, as submitted and attached hereto as "Exhibit B".
4. That Leland L. Carter be appointed to serve as River Commissioner of the Lake Fork River, Yellowstone River and Sand Wash Creek, for a period of one (1) year.
5. That the Committee for the Lake Fork River, Yellowstone River and Sand Wash Creek be authorized to appoint a temporary replacement should the River Commissioner be unable to complete the one (1) year term.
6. That the specific job description outlining the duties and responsibilities of the River

Commissioner be approved.

7. That the Commissioner be authorized to deal with the Rowley diversions by arranging and paying for replacement or new diversion works and assess the water users of those diversions the cost if the water users do not make the improvements required by the Commissioner to the Commissioner's satisfaction.

8. That the applicable provisions of the 1998 Interim Order, as presented herein, be reaffirmed and made effective for the year 2017.

DATED this 17 day of April, 2017.

LAKE FORK RIVER COMMITTEE ANNUAL MEETING

January 24, 2017

Rodger Ames chairman of the board called the meeting to order at 2:00 pm

PRESENT:	Leland (Lee) Carter	Lake Fork Yellowstone and Sand Wash Creek River Commissioner
	Rodger Ames	Associate Water Users/Chairman of the Lake Fork River Board
	Kirk Christensen	Associate Water Users/Director of the Lake Fork River Board
	Ken Asay	Bureau of Indian Affairs/Division of irrigation
	Kelly Banks	Minutes

Election of new committee chairman

Kirk Christensen motioned to leave Rodger Ames as chairman by acclamation

Ken Asay 2nd

Motion carried

MINUTES: Kelly Banks read the minutes for the January 2017 meeting

Ken Asay motioned to accept the minutes as corrected

Kirk Christensen 2nd

Motion carried

BUDGET AND EXPENDITURES: Lee went through the budget and expenditures and gave a comparison from 2016 to 2017. The River Automation fund savings fund is \$15,000 which made the budget \$103,000 and on the River Automation fund was \$22,822.55. Lee said they have not been reimbursed for the 45% and what should come from the Water Smart Grant. Lee is working with off river automation and helping put in some sites. Some of the cost is listed in the budget and they will get reimbursed for these costs. Rodger asked if \$2,000 was enough for what is done off river. Lee said it is doable for now but it is close. Rodger suggested that since the budget is made for 2017, next year they could add another \$1,000. for the off river work. Rodger asked if Ken and Kirk would be ok with increasing the off river automation budget another \$1,000. Lee mentioned that not all companies have off site river automation yet but there is more being added. Rodger mentioned that Doug Swasey wasn't very happy to be helping pay the bill for the automation as they don't have any automation on the Lakefork Western. Lee said that more sites are being added all the time. Lee went talked about what was budgeted for 2016 and what was paid out. Everything looks good. There were a couple of differences, Legal fees were under budget and the River Automation is a over, but there is still some money coming in for the river automation.

Kirk Christensen motioned to add \$1,000 to the budget for the automation

Ken Asay 2nd

Motion carried.

PROPOSED BUDGET & ASSESMENTS: Each company will be assessed a % of how much water is used through each company. There is a \$50.00 base charged over the amount of water each company uses. Lee proposed \$103,000. for the 2017 budget leaving it the same as it was last year. Associate water users are a little over 75% and Uintah project is about 25%.

Lee presented the 2017 budged. Rodger asked Lee if he was ok with the mileage and Lee said he felt good about was had been proposed for the year. Lee is proposing to leave the \$5,000 for the river automation funding. Lee said there is one project that he is working on that he is hoping to add to the automation. Lee is hoping to get some repairs and some issues resolved on the problems with the radios getting ruined. Rodger asked about the Rural Water Technology, if the DCWCD paying a portion of that cost. Lee said there had been some talk about it but there has not been anything done on it. Kirk thought they said they were going to keep paying a portion. Rodger said that in the future if DCWCD backs out that would be an added cost for the Lake Fork River committee. Rodger asked Ken how he feels about the automation and Ken said they have talked to Dex Winterton and asked about the possibly of putting in more sites. Rodger asked Ken where the extra funding would come from and Ken said it probably would come through the company through the assessments. The board

talked about how nice it is to have the automation. Lee feels like things are looking good right now and he asked the board how they feel about the proposed budget and the board said they are good with the way things are right now.

Ken Asay motioned to accept the proposed budget and assessments for 2017

Kirk Christensen 2nd

Motion carried

RIVER COMMISSIONERS REPORT: Lee asked Ken to talk about the Superintendent of the BIA. Bartholomew Stevens was requested to go work for BIA in Washington so they thought they were going to get a new Superintendent soon but there has been a hiring freeze. Rodger asked who was acting as Superintendent right now and Ken said Antonio Pancrea.

Total water diverted was 173,451.39. Total budget and expenditures for 2016 was \$120,822.55. cash on hand \$84,823.27 as of November 1st 2015 assessments \$103,000. Interest made: \$30.75 cash on hand as of October 31, 2016 \$67,854.35 Disbursements: \$120,368.67 Rodger asked about moving money into savings. Lee said he had not done that yet. The board thought Lee should go ahead and move at least \$20,000 over to savings from checking. Lee will let the board know when he moves it to the savings account and also if he needs, at any time, to move it back to the checking account.

The area served: Lee went through the area served for 2016, the duty of water deliveries and water supply. Rodger asked Ken about the duty schedule if he would like to take it over and Ken said he hasn't had any complaints so it can stay as it is. Lee said he just goes with what has been delivered historically and he tries to make sure they get 3 ac-ft. Ken asked about the splitting of water that is being delivered and Rodger and Lee said that it is a % of what is in the ditch. Junior Tidwell is the director over that ditch and he is the one that delivers that water and does a good job. Ken said they may get together this summer and go up and look at it. Rodger said that a few years ago there were some complaints about how the water was diverted. So Rodger wanted to make sure that Ken was ok with the way the water was being diverted and he said yes it is good. Lee talked to the board about the Lakefork Western and how the water is used and diverted through that system. Lee said that he really tries not to lose any water.

UCWID FLOWS 2016: Kirk talked about the water right of Dry Gulch Class B for the summer months and for the winter months they have are from the lease they have with Altamont. Ken asked if they provided a statement to the tribe to see what and where the water is coming from. Lee asked Kirk if they have enough water allotted to project out several years. Kirk said they have a master plan that is projected a 50 year plan for the water. Kirk said that a lot of this is based on the water conservation.

Lakefork irrigation in C canal. Rodger explained that this is mostly on a call system but they do have 80 shares of water that was exchanged for Class A water. Rodger said there is about a 10% shrink. They do take a 10% fee for loss. Rodger said that DGIC is separated.

Rodger suggested Lee break out the high mountain flows.

Lee talked about how Dex, the MLWUA manager, has been very instrumental in getting the Moon Lake projects on the Scata system and automation. Lee talked about the automation and how it works so he can look at the river and flows at anytime. Lee said he has a court order to deliver water for the Sandwash irrigation company. Rodger said that the Hartman's, blood draw on the Sand Creek delivery where the water rights are for Sandwash Irrigation Company, they have had a fight because they have a small tributary that feeds Sand Creek, but it is working better now. The primary water right is Sand Wash Irrigation, 2nd is DGIC and 3rd is MLWUA and then Blood Draw has a priority right on a little amount of water. The Fish Bypass has temporarily purchased 1500 and Roosevelt City purchased the rest. Lee asked Kirk if Roosevelt City will be the ones to purchase it or if there are any other companies interested in it. Kirk said there are a couple other companies that are interested in it. They asked the upper country if they wanted it but it isn't feasible for them.

Crystal Ditch is undergoing changes that require Utah State Water Rights Division to decide appropriate management and delivery of water for their water rights. Rodger, Kirk and Lee went up and toured the site and they are using a lot of water. Mark Ludlow couldn't understand why they were concerned with the amount of water that they are using. Kirk said they have made a mile of the river and with the area that they are flooding they are making wet lands and the evaporation there is a lot of surface area that could result in a big loss. Bob Leake the State Engineer, went up and looked at it and he talked to the Core of Engineers, NRCS, fish & game. They do have a tertiary water right up there, all tribal water, Class A & C of associated water, and Moon Lake water rights have to be met. Lee said that there are some years that they have no rights. Bob said it was explained to him different than what has been done up there. There is a non consumptive water right up there where they are doing the work. Lee said the Lakefork River Commission Board as well as MLWUA has protested the work that is being done. Bob Leake the other entities involved will look at it and decide what to do on this situation. Bob said it was worked out, but they haven't finished up all the details. Rodger said that after the protest they put in a diversion

which the NRCS made them put it in to get funding. Lee said they will have to buy water rights to come up with the water right that they would need. Lee will follow the water rights. Lee asked the board if they come up with a procedure to say it is non-consumptive when they add the water right they could very easily generate water to the river. Lee wondered if there should be 2 measuring devices, 1 at the top and 1 at the bottom. Rodger said that the way they have intercepted the water it will make water. The board agrees that it needs to be studied and it should be engineered. Kirk said there should be one at the top but the board didn't think they should have one at the bottom. Kirk feels that there should be a study done up there to see how much evaporation and loss there is.

The board said they like the River Commissioners Report, it is very informative.

2016 ITEMIZED AND SUMMARY REPORT: Rodger asked for a motion to accept the finances

Kirk Christensen motioned to accept the finances

Ken Asay 2nd

Motion carried

US LAKEFORK: Lee said they have had a lot of expenses for batteries so Lee is looking at putting a bigger solar panel in and upgrading the sensor and he feels it will eliminate some of the cost for all the batteries they have been using. Rodger will help put it in. Rodger suggested a new structure on the US Lakefork with the money that could be available. Ken said there was an act of congress passed that authorized the funding but did not provide funding. They will have to go back with projects and they will try to combine it with some other funding that is out there. Rodger said it takes a lot to move the gates so if they could get some different gates up there that would be good. Rodger asked about radial gates and Lee wasn't sure on the radial gates and how he feels about them at this time. Lee said they do have some pretty expensive equipment up on those gates right now.

NEW BUSINESS: No new business

Kirk Christensen motioned to have Lee Carter as the River Commissioner

Ken Asay 2nd

Motion carried

Lee will take the paper work over to the attorney and petition the court.

DUTY OF THE PRESIDENT: needs to be available to over see things with the river commissioner

CLOSING: Talked to Ken about him being on the account and Ken said it was good the way it is for now.

Motioned to Adjourn by Kirk Christensen at 4:19 pm

February 10, 2017

River Committee Meeting:

Attendance:

Rodger Ames: President River Committee, President Association
Water

Kirk Christensen: Director River Committee, Director Associate
Water

Ken Acey: Director River Committee, Bureau of Indian Affairs
Irrigation Manager

Leland L. Carter : Lake Fork and Yellowstone River Commissioner

Leland found an error in the 2017 Assessment for the Budget and presented the correction to the committee. The committee reviewed the correction and approved the corrected 2017 Assessment for the Budget. The committee suggested that two intermediate budget meeting would make the review of River Commission data more robust. It was approved to have a two intermediate river committee meeting approximately June 15 and September 15 for review.

Meeting adjourned.
